What is the Global Internship Facilitation of Taiwan (GIFT)?

In 2016, Tunghai University and the Corporate Synergy Development Center created the Global Talent Pipeline Platform. This platform connects universities, businesses, and students, providing current university students in Taiwan an opportunity to acquire professional experience and skills through hands-on experience. This is a system that provides talent development and matching services by combining training, internship, and job placement.

Due to the achievements of the program, the platform received approval and funding from the Ministry of Education in May 2018. The platform was expanded to include foreign and overseas Chinese students studying in Taiwan, with the goal to attract outstanding and talented students from around the world to come study and work in Taiwan. Businesses can provide internship opportunities, which will allow them to contact and recruit talented students in advance.

Currently, there are 430 companies on this platform, representing 28 industries and providing internship opportunities in 45 countries. An alliance of 18 universities has joined the platform, with 75 instructors from these schools serving as internship mentors for the students. Over 309 students have interned at countries including Taiwan, Italy, Indonesia, Vietnam, and India.
