

**Greetings from Kaohsiung Medical University.** Hope this mail finds you well.

We are honored to share with you **KMU Today**,

**KMU FOUND NOVEL PREVENTION OF DENGUE FEVER**

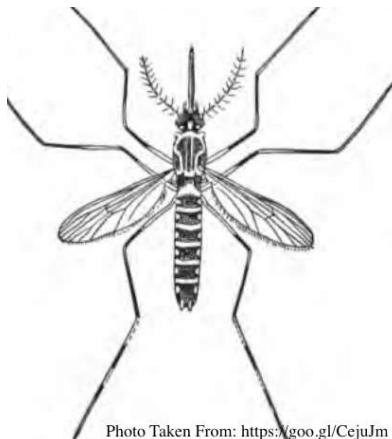

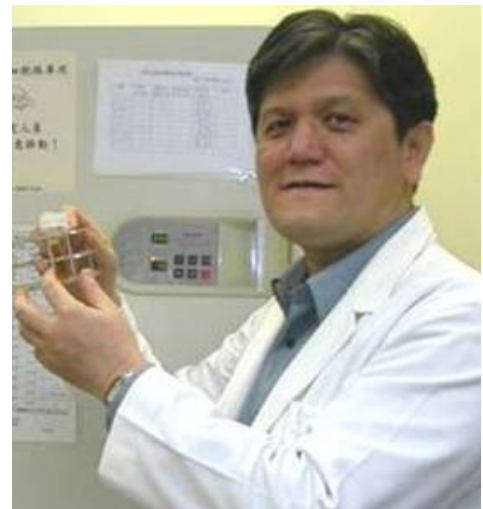

Photo Taken From: <https://goo.gl/CejuJm>

Professor Chien-Ming Shih at KMU found viral burden and proportion of virus carried by vector mosquitos would vary in different environment. Instead of adopting patient-oriented precaution, the research is mainly targeted at the viral burden in connection with the time of infectious disease, in hope for predicting the outbreaks and making preventions in the future.

**KMU OLIGO FUCOIDAN CLINICAL TRIAL RESULTS ATTRACT INTERNATIONAL ATTENTION**

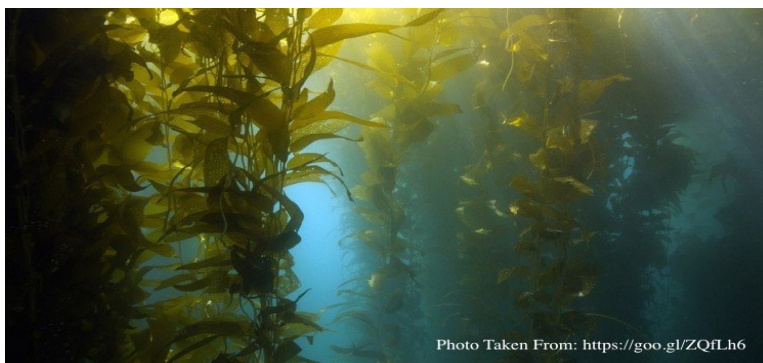

Photo Taken From: <https://goo.gl/ZQfLh6>

Kaohsiung Medical University Hospital Vice Superintendent Jaw-Yuan Wang and Department of Colorectal Surgery Dr. Hsiang-Lin Tsai, published Clinical trial results "*Taiwan Oligo Fucoidan*" in 2017 Gastrointestinal Cancers Symposium held by American Society of Clinical Oncology (ASCO) has received international attention.

**QS ACADEMIC SURVEY**
