

## KMU Hosted the First Global QS Subject Focus Summit on Medicine

**QS SUBJECT FOCUS SUMMIT**  
MEDICINE

In 16th -18th October, over 350 experts from 20 countries attended the First QS Subject Focus Summit on Medicine: Universities Innovating for Future Healthcare in KMU. The global leaders shined a brighter and advanced visions on the Medical Curriculum of the 21st Century and to reinvent the academic medical career for the future medical graduates.

## KMU medical team saved infants in SOLOMON ISLAND

Since 90's, Solomon Islands and KMU have fully developed medical training, hospital management, and on July, Dr. Kung-Shing Lee of KMU successfully operated on an infant with hydrocephalus and saved her life. Dr. Lee also taught local surgeons to perform the Hydrocephalus surgery and postoperative care. KMU also provided equipment to Solomon Islands, together to save children in the future.

## Peptide New Drugs for Osteoarthritis developed in KMU

In September, Orthopaedic Research Center in KMU successfully developed peptide new drugs for early treatment of Osteoarthritis (OA), inhibiting articular cartilage degradation and death. The new results were awarded with 4 million U.S. dollars for successful technology transfer, the largest scale recently.
